

SECTION: CLAIM AMENDMENTS

Pursuant to 37 CFR 1.121, a complete listing of all claims in the application, and their status, is set forth below. The text of each pending claim is also provided. Please amend the pending claims as follows, wherein added matter is underlined and deleted matter is ~~stricken through~~ or ~~[[double bracketed]]~~ in the text of the currently amended claims, relative to the immediate prior version. The claims in this listing are deemed to replace all prior claims in the application.

1. (Currently Amended) A device for producing energy, using a reservoir ~~[[(1)]]~~ filled with liquid, or submerged in liquid, and at least two moving pistons ~~[[(3,3')]]~~, which are tightly installed in guides ~~[[(4)]]~~ in the wall of the reservoir, characterized in that the reservoir ~~[[(1)]]~~ is supported on rollers/rolls located against its outer surface, or on a central shaft.
2. (Original) A device according to Claim 1, characterized in that there are at least two pairs of pistons.
3. (Currently Amended) A device according to Claim 1, characterized in that in the immediate vicinity of each piston ~~[[(3)]]~~ there is a weight ~~[[(5)]]~~ that can be moved essentially in the radial direction of the reservoir ~~[[(1)]]~~.
4. (Currently Amended) A device according to Claim 1, characterized in that there are two pairs of pistons ~~[[(3,3')]]~~ and that the pistons located on different sides of the reservoir are attached to each other by means of a connecting rod ~~[[(7)]]~~.

5. (Currently Amended) A device according to Claim 1, characterized in that the weight ~~[[5]]~~ is intended to move along at least one separate guide ~~[[6]]~~.
6. (Currently Amended) A device according to Claim 1, characterized in that the pistons ~~[[3]]~~ are essentially cylindrical and that the piston guides ~~[[4]]~~ are permanently attached to the jacket of the reservoir ~~[[1]]~~.
7. (Currently Amended) A device according to Claim 1, characterized in that the reservoir ~~[[1]]~~ is filled with a liquid, particularly water and that the reservoir is located in the atmosphere.
8. (Currently Amended) A device according to Claim 1, characterized in that each piston ~~[[3,3']]~~ is located in a separate sleeve-like device ~~[[9]]~~, which is sealed around the guide ~~[[4]]~~, so that the piston ~~[[3]]~~ and the device ~~[[9]]~~ are separated from each other by a gap, through which water can penetrate.
9. (Currently Amended) A device according to Claim 7, characterized in that the piston ~~[[3]]~~ and the device ~~[[9]]~~ can be detached from each other.
10. (Currently Amended) A device according to ~~any of the above Claims~~ Claim 3, characterized in that the device includes, ~~if desired~~, additional weights ~~or floats~~.

11. (New) A device according to Claim 1, characterized in that the device includes at least one float.
